The journal is very grateful to all Readers, Authors, Reviewers, and Editorial Board Members who participated in developing a successful Volume 12. It was a prolific year, with 600 published papers and a 48% acceptance rate. Biointerface Research in Applied Chemistry published all papers under the platinum open-access policy. Even if it is the beginning of 2022, the journal finalized the volume assigned to the year 2022 and started the volume assigned to 2023. Starting with this volume, the traditional pagination method was replaced with article numbers. All the papers were indexed in Clarivate Analytics (fig 1).

Biointerface Research in Applied Chemistry cordially invites contributors to submit their recent research or reviews for publication using the complete journal submission system <https://jams.amgtranscend.org/>.

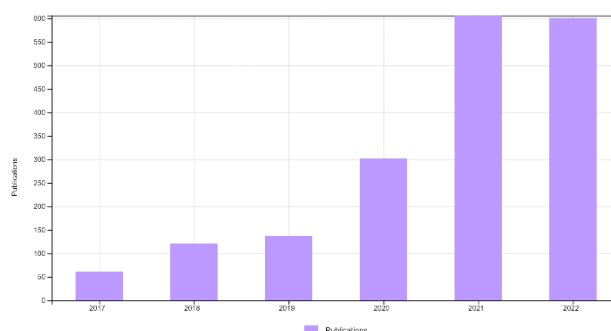

Figure 1. The number of papers indexed in Clarivate Analytics in the last 6 years.

Keywords: biointerface; applied chemistry; platinum open-access.
