Editorial

As we started our fourth year of activity, Biointerface Research in Applied Chemistry would like to acknowledge the effort of all contributors that trusted this scientific journal, and of all editors and reviewers for their hard work and dedication. The journal accounts 84 research papers, 24 of them being published in 2013. Papers published from 2011 to 2013 bring together 373 citations according to Web of Knowledge. All these citations were provided by different papers published in other journals than Biointerface Research in Applied Chemistry.

The most cited paper according to Web of Knowledge is ***“Phenotypical studies for raw and nanosystem embedded *Eugenia carryophyllata* buds essential oil effect on *Pseudomonas aeruginosa* and *Staphylococcus aureus* strains”*** by Saviuc *et al.*, and it brings to the journal a number of 36 citations.

Biointerface Research in Applied Chemistry will continue publishing high quality papers and we expected to trigger further citations and our first impact factor.

Hooping that you will find interesting this journal, we are looking forward to receive your papers and your special issue proposals at your earliest convenience.
